Present Appointment

MRC Integrative Epidemiology Unit, University of Bristol

SENIOR RESEARCH FELLOW

UK

Jan-18 to present

Previous Appointments

MRC Integrative Epidemiology Unit, University of Bristol

RESEARCH FELLOW

UK

Jan-14 to Dec-17

Queensland Brain Institute, University of Queensland

POST DOCTORAL STATISTICAL GENETICIST

Australia

Jan-12 to Dec-13

Academic Qualifications

University of Bristol

ASSOCIATE OF THE HIGHER EDUCATION ACADEMY, UK

Bristol

Sep-19 to Mar-20

University of Edinburgh

PHD IN QUANTITATIVE GENETICS

Edinburgh

Oct-07 to Aug-11

University of Nottingham

BSC (HONS) 2:1

Nottingham

Sep-03 to Jun-06

Special Awards, Honours and Distinctions

Sir Kenneth Mather Memorial prize

BEST PHD THESIS IN QUANTITATIVE AND POPULATION GENETICS

The Genetics Society

2011

Teaching and related administration

Though I have only had research-based academic appointments, I have found many opportunities to develop a variety of different teaching materials from my PhD to present. While at the University of Bristol I received invitations to develop and deliver week-long courses to researchers at the Wellcome Genome Campus, and institutions in Italy (with one other person), Brazil (coordinating a group of teachers) and South Africa (with one other person). I have also developed and directed a 20-credit module on genomic data science for intercalating medical students at the University Bristol, training students in critical reasoning and computer programming. I am leading the Anti-Racism special interest group in Decolonising the Curriculum, whose plans I detail at the end of the CV.

(I) UNDERGRADUATE AND TAUGHT POSTGRADUATE (PAST 3 YEARS)

Evidence Based Medicine unit in MB ChB programme

TUTOR

University of Bristol

2020

Genes and behaviour (PSYC30018)

LECTURER

- 100 3rd year undergraduate students
- wrote and delivered three lectures

University of Bristol

2018, 2019

Genomic Medicine iBSc

PASTORAL TUTORING

- Two students on the Genomic Medicine iBSc

University of Bristol

2017, 2018

Genomic Data Science unit in Genomic Medicine iBSc

COURSE LEAD

- Up to 13 intercalating 3rd year medical dentistry and veterinary students
- Led, co-wrote and delivered 4-week module (20 credits)
- Organised material for several lecturers on programming, statistics, genetic analysis
- Set formative and summative coursework assessments
- Designed and wrote exams
- Delivered lectures, tutorials, practicals, assessed debates
- Transitioned to flipped classroom format
- Several students publish papers each year on the subject

University of Bristol

2016-2018, 2020

(II) MAJOR TEACHING RESPONSIBILITIES IN PREVIOUS YEARS

Statistical genetics unit in Biomedical Capstone Course

COURSE LEAD

- 250 3rd year undergraduate biomedical students
- Wrote four lectures and two workshops on GWAS written
- Set and marked coursework assessments
- Delivered lectures and practicals, and coordinated lecturers and tutors

University of Queensland

2012, 2013

(III) INNOVATORY UNITS AND TEACHING METHODS

Flipped classroom: In the second year of the iBSc Genomic Medicine course I redesigned the R programming training section to be a flipped classroom, using online games for students to learn the basic principles of programming at home and the tutor led sessions as an opportunity to synthesise those skills into applied examples. The students were more adept at programming than in the previous year, and also more enthused about the subject. I transitioned the rest of the module to a flipped classroom in 2020 during the Covid-19 pandemic.

(IV) CONTRIBUTION TO LIFE-LONG LEARNING AND CONTINUING PROFESSIONAL DEVELOPMENT COURSES

Short courses that I have (co-)written and led in the last 3 years

Genetic Analysis of Population-based Association Studies short course,

COURSE CO-LEAD

- 40+ international post-graduate students and researchers
- Invited to co-lead a course that has been running for 12 years, approx
- Contribute to course design, and recent redesign for online teaching
- Delivering lectures and practicals

Wellcome Genome Campus

2018-2020

MR-Base workshop, MR conference

COURSE LEAD

- 60 International post-graduate students and researchers
- Wrote and delivered lectures and tutorials on how to use the MR-Base database and R packages

Bristol

2017, 2019

Genetic Epidemiology short course at EEPE

COURSE CO-LEAD

- 20 international post-graduate students and researchers
- Co-wrote and delivered (with Prof Dave Evans) 5-day course
- Prepared and delivered lectures + practicals.

Florence, Italy

2016-2018

UNIX and Genetic epidemiology

COURSE CO-LEAD

- 30 researchers and post-graduate students
- Co-wrote and delivered 7-day course
- Lectures and practicals
- Setup cloud-based computing system for practical sessions

Pelotas, Brazil

2015

Genetic epidemiology, H3Africa project

Johannesburg, South Africa

COURSE CO-LEAD

2014

- 30 researchers and post-graduate students
- Co-wrote and delivered (with Dr Nic Timpson) 5-day course
- Delivered lectures and practicals.

Introduction to R

University of Edinburgh

COURSE CO-LEAD

2009

- 30 researchers and post-graduate students
- Co-wrote and delivered (with Joseph Powell) 2-day short course on R programming

Lecturing contributions

Statistical methods for mediation short course

University of Bristol

LECTURER

2017, 2018

- 40 post-graduate students and researchers
- Wrote and delivered one lecture + practical

Genomic medicine iBSc

University of Bristol

LECTURER

2016-2018, 2020

- Up to 13 intercalating 3rd year medical, dentistry and veterinary students
- Wrote and delivered three lectures to other units

Statistical genetics short course

University of Bristol

LECTURER

2015-2019

- 40 post-graduate students and researchers
- Wrote and delivered two lectures + practicals

Mendelian randomisation short course

University of Bristol

LECTURER

2014-2020

- 40 post-graduate students and researchers
- Wrote and delivered two lectures + practicals

18th Summer Institute in Statistical Genetics

Seattle USA

TEACHING ASSISTANT

2013

- 40+ international post-graduate students and researchers
- Teaching assistant for: "Human Complex Traits" and "Animal Genetic Data Analysis"

Introduction to git and programming workflows

University of Queensland

WORKSHOP LEAD

2013

- 15 researchers
- Wrote and delivered one-day workshop

Introduction to Statistics

University of Queensland

LECTURER

2012

- 40+ post-graduate students and researchers
- Wrote and delivered one lecture for a professional Development Course

(V) COLLABORATIVE TEACHING PROJECTS

Developed external speaker programmes for iBSc medical students, involving Jeff Barrett from OpenTargets and the Sanger Institute; Rob Scott from GlaxoSmithKlein; and Jonathan Ives from the Centre for Ethics in Medicine.

Also see above for details on a number of short courses in Australia, Brazil, Italy, South Africa and Cambridge, which were co-developed with colleagues from those regions.

(IV) POSTGRADUATE ADVISING

PhD Supervision

Lily Andrews

CRUK

2020-2024

- Secondary supervisor

Amanda Forde

SCIENCE FOUNDATION IRELAND

2020-2024

- Secondary supervisor
- Co-supervising with international colleague (John Ferguson), Republic of Ireland

Giulio Centorame

NHMRC

2020-2024

- Secondary supervisor
- Co-supervising with international colleague (Dave Evans), Australia

Chris Moreno-Stokoe

BBSRC

2018-2022

- Secondary supervisor

Hannah Wilson

BBSRC AND GSK

2017-2021

- Primary supervisor

Thomas Battram

WELLCOME TRUST

2016-2020

- Primary supervisor
- Passed viva with distinction

Laurence Howe

WELLCOME TRUST

2014-2018

- Secondary supervisor
- Passed viva with distinction
- Awarded best doctoral research prize 2018/2019 in Faculty of Health Sciences

(VII) MAJOR ACHIEVEMENTS IN TEACHING ADMINISTRATION

Anti-racism: I co-lead the Special Interest Group on decolonising the curriculum in the Bristol Medical School. I am creating a framework by which course leads across the school can identify racial biases in their teaching methods and materials, work towards address them, and obtain independent course review from external peers.

Courses on my software: I developed a course to teach researchers how to use my own software (MR-Base), with the course being heavily over-subscribed and gaining very positive feedback and increased usage of the software.

Research and related administration

I was awarded a Wellcome Trust Sir Henry Dale fellowship award in 2018. I have translated my background in quantitative genetics and high performance computing to genetic epidemiology research, resulting in the development of the MR-Base causal inference analytical platform and OpenGWAS data infrastructure. This software is used by researchers within the institute and around the world, has led directly to funding for five post-doctoral positions from three private companies (GSK, Biogen, CHDI). I currently lead or co-lead two major international collaborations: The GoDMC consortium comprising 56 cohorts analysing the genetics of DNA methylation; the OpenGWAS consortium that combines the resources of over 100 groups and consortia.

(I) PUBLICATIONS

Selected publications organised by category are listed below. Full publication list on google scholar: <https://scholar.google.co.uk/citations?user=...>

- H-index: **44**
- i10-index: **87**
- Number of publications: **155**

Academic journal papers (refereed)

1. Griffith, G., T Morris, T., Tudball, M., Herbert, A. & Mancano, G. *et al. medRxiv* (2020) Role: senior author. Position: 13/13.
2. John Lawson, D., Martin Davies, N., Haworth, S., Ashraf, B. & Howe, L. *et al. Human Genetics* (2020) Role: senior author. Position: 7/9.

3. T Morris, T., M Davies, N., Hemani, G. & Davey Smith, G. *Science Advances* (2020) Role: senior author.
4. Zheng, J., Haberland, V., Baird, D., Walker, V. & C Haycock, P. *et al. Nature Genetics* (2020) Role: senior author; International co-authors. Non-academic co-authors. Position: 32/34.
5. G Richardson, T., Hemani, G., R Gaunt, T., L Relton, C. & Davey Smith, G. *Nature communications* (2020) Role: main analyst.
6. L Anderson, E., D Howe, L., H Wade, K., Ben-Shlomo, Y. & David Hill, W. *et al. International journal of epidemiology* (2020) Role: senior author. Position: 13/13.
7. Brumpton, B., Sanderson, E., Heilbron, K., Pires Hartwig, F. & Harrison, S. *et al. Nature communications* (2020) Role: senior author. Position: 32/33.
8. Cho, Y., C Haycock, P., Sanderson, E., R Gaunt, T. & Zheng, J. *et al. Nature communications* (2020) Role: senior author. Position: 8/8.
9. Emma Russell, A., Ford, T., Gunnell, D., Heron, J. & Joinson, C. *et al. Brain, behavior, and immunity* (2020) Role: senior author. Position: 9/10.
10. G Richardson, T., Harrison, S., Hemani, G. & Davey Smith, G. *Elife* (2019) Role: main analyst.
11. P Morris, A., H Le, T., Wu, H., Akbarov, A. & J van der Most, P. *et al. Nature communications* (2019) Role: main analyst; International co-authors. Position: 6/72.
12. Leland Taylor, D., U Jackson, A., Narisu, N., Hemani, G. & R Erdos, M. *et al. Proceedings of the National Academy of Sciences* (2019) Role: main analyst; International co-authors. Position: 4/22.
13. J Howe, L., G Richardson, T., Arathimos, R., Alvizi, L. & R Passos-Bueno, M. *et al. Epigenomics* (2019) Role: senior author. Position: 17/18.
14. J Howe, L., J Lawson, D., M Davies, N., St Pourcain, B., J Lewis, S., Davey Smith, G. & Hemani, G. *Nature communications* (2019) Role: senior author. Position: 7/7.
15. Hemani, G., Zheng, J., Elsworth, B., H Wade, K. & Haberland, V. *et al. Elife* (2018) Role: main author; International co-authors. Position: 1/20.

(VI) RELATED ADMINISTRATION

Leading group on Covid-19 epidemiology

MRC IEU

2020 to present

- Initiated project, and recruited group of 12 researchers
- Provided analysis of ZOE symptom tracker app for external collaborators
- Culminated in four publications, numerous presentations including to SAGE and HDRUK

Initiating the OpenGWAS consortium

MRC IEU

2020 to present

- The OpenGWAS data infrastructure receives 2 million queries per week
- The consortium brings together researchers who develop software for GWAS summary data
- Plans to expand the invitation to international collaborators

Member of the UoB Covid modelling subgroup

UNIVERSITY OF BRISTOL

2020 to present

SEGEN conference organiser

SOUTH OF ENGLAND GENETIC EPIDEMIOLOGY GROUP

2019

- Organised the long-running SEGEN conference to be held in Bristol for the first time

Leading work package on MR method development (programme 1)

MRC IEU

2018 to present

- Line managing one post doctoral scientist

Leading statistics and informatics theme in epigenetics programme 4

MRC IEU

2018 to present

Leading Hemani research group

MRC IEU

2018 to present

- Four post-docs and four PhD students
- Weekly group meetings including pastoral and career support

ALSPAC Board of Directors

ALSPAC

2017 to present

Leading genetics work package

ALSPAC

2017 to present

- Line managing one post doctoral scientist

Academic leadership and citizenship

(I) ACADEMIC LEADERSHIP IN THE DISCIPLINE

Lead

OPENGWAS PROJECT

University of Bristol

2020 to present

- Software and data coordination across 100+ groups

Co-lead

MR WITHIN-FAMILY WORKING GROUP

University of Bristol

2018 to present

- Co-leading international group of 20+ genetic family studies, over 100,000 sibling pairs

Co-lead

GENETICS OF DNA METHYLATION CONSORTIUM

University of Bristol

2015 to present

- Co-leading international group of 56 cohorts in genetic and epigenetic association analysis

Co-lead

MR-BASE

University of Bristol

2015 to present

- Co-leading GWAS summary data repository comprising >70 GWAS consortia

(II) ACADEMIC LEADERSHIP IN THE UNIVERSITY

Group member

MEDICAL ANTI-RACISM TASKFORCE

University of Bristol

2020 to present

- Leading Special interest group on decolonising the curriculum

Software developer

UoB COVID-19 SITUATION REPORT

University of Bristol

2020 to present

- Web app developed for internal use that provides daily updates and case mapping
- Used daily by the Incident Management Team in targeting Covid-19 actions

Group member

BRMS EQUALITY DIVERSITY INCLUSION GROUP

University of Bristol

2018 to present

- Working in career progression subgroup

Software developer

USS PENSION CALCULATOR

University of Bristol

2018 to present

- Developed a web-app that allows members of the USS pension scheme to calculate changes to the pension under proposed valuation changes
- Used widely by universities across the country
- <http://www.uss-pension-model.com/>

Reviewer

TEACHING PEER REVIEW

University of Bristol

2018

- Causal inference short course, University of Bristol

(III) PROFESSIONAL ACTIVITIES OUTSIDE THE UNIVERSITY

- 2019 - Contributing to the design for the Early Disease Detection Research Programme that will be used to genotype up to 5 million people in the UK
- 2017 - Regular peer review for various grant bodies including the MRC, Wellcome Trust, Cancer Research UK
- 2012 - Regular contributor to open source software projects (e.g. see <https://github.com/explodecomputer/random-metal> and <https://github.com/explodecomputer/ldsc/>)
- 2011 - Regular peer review for 20+ academic journals

(IV) CONTRIBUTIONS TO SOCIETY

- 2017 - 2019 Regularly provide private accommodation for asylum seekers and refugees through the *Refugees at Home* charity
- 2015 - Contributing member to the charity *Statisticians Without Borders*
- 2014 - Provide web and software support to local vegan organisations

(V) ENTREPRENEURSHIP, ENTERPRISE AND PARTNERSHIPS

- 2015 - I have formal partnerships with GlaxoSmithKlein, Biogen, Pfizer and CHDI that arose through developing the MR-Base platform. This has led to five post-doctoral positions and one PhD position being funded by these organisations, and the development of a standardised contract system to enable future such collaborations to occur.

(VI) GOOD CITIZENSHIP

- 2020 Developed software for the University's Incident Management Team which maps new Covid-19 cases amongst students across the region in real time. This software is used in daily team management meetings
- 2020 Leading a Special Interest Group on Decolonising the Curriculum, which will bring in a framework for all courses across the medical school for dealing with implicit bias within their learning materials
- 2020 Member of the Bristol Clear mentoring scheme (currently mentoring two early career researchers)
- 2016 - Participated in numerous mock interview panels for research fellowships
- 2015 - Extensive software development for the MRC IEU research community, most notably the MR-Base software platform which I created and maintain for others to use. I am pleased that this has grown to be a platform for numerous research papers, and contributed substantially to research grants, many of which I am not named on
- 2014 - Voluntary curation and documentation of shared data resources
- 2014 - Web and software development for the ALSPAC project (e.g. see <http://variables.alspac.bris.ac.uk/> and <https://github.com/explodecomputer/alspac>)
- 2014 - Throughout my time in Bristol I have made it a priority to provide informal training to early career researchers, particularly in genetics, software development and reproducible research.

Future plans

My fellowship is focused on implementing causal inference on a phenome-wide scale, creating a graph of the causal estimates of every phenotype against every other phenotype. I will create collaborations within the University and externally with experts in artificial intelligence, to explore new ways to exploit this graph for biological understanding and medical applications. I will use my causal graph to develop new ways to engage with the public, exploring how perceived ideas of medical interventions would shape future trajectories of population disease burden.

I plan to develop a new professional development course that guides junior researchers and post-graduate students through best practices in code and data management and reproducible digital research.

Through leading the special interest group on decolonising the curriculum, my goal is to develop a method of accreditation for courses across the medical school to introspectively examine potential biases in their teaching materials, identify ways of addressing them, and seek external review of proposed changes. This is a project of crucial importance for equipping the graduates and trainees in redressing biases that continue to incur health inequalities between ethnic groups.
